Receipt is acknowledged of the Amendment filed February 4, 2005.

Reasons for Allowance

Claims 16, 18-24, and 29-41 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: the best prior art of record, Traylor, taken alone or in combination of other references, does not teach or fairly suggest a method or a write clock present detector for a FIFO circuit comprising, among other things, a read shift register and a write shift register, wherein the first plurality of registers in the read shift register is larger in number compared to the second plurality of registers in the write shift register (claims 16, 23); another shift register coupled to receive the output of the read shift register to generate a delayed read flag signal and a logic circuit comprising a logic gate coupled to receive the output of the write shift register and the output of the read shift register; and a register having a data input coupled to receive an output of the logic gate and having a clock input coupled to receive the delayed read flag signal to generate a write clock present signal (claim 30); and a method of using the read flag signal to generate a reset signal for the read and write shift registers (claim 36), as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
